INTRODUCTORY.

THE CAMBRIDGE DIRECTORY for 1883 has been compiled with the greatest care, and we have canvassed every house and business place in order to have all information furnished made as correct as possible, and trust we have succeeded in so doing. We have also been to a great expense in engraving a new map with location of proposed bridge, Cambridge Hospital, Longfellow Park, Harvard College Park, etc., etc., which we trust will meet with the approval of a deserving municipality.

We wish especially to call the attention of persons using the directory, to the importance of knowing the precise spelling of a name before looking for it, as names, pronounced the same, but spelled in various ways, will appear on different pages, and at quite a distance from each other.

A *full* directory of Harvard College Professors and Students will be found on page 369.

For the support we receive from the business men of Cambridge. as well as the citizens who do business in Boston, we are under many obligations; also to the officers of the various societies and institutions for information furnished us, we present our thanks.

The following shows the increase in names over last year:

Names in Directory, 1882, ...	20,450
" " " 1883, ...	21,266
Increase, ...	816

We remain, very respectfully,

W. A. GREENOUGH & CO.,

BOSTON, Jan. 1, 1883. *Compilers and Publishers.*

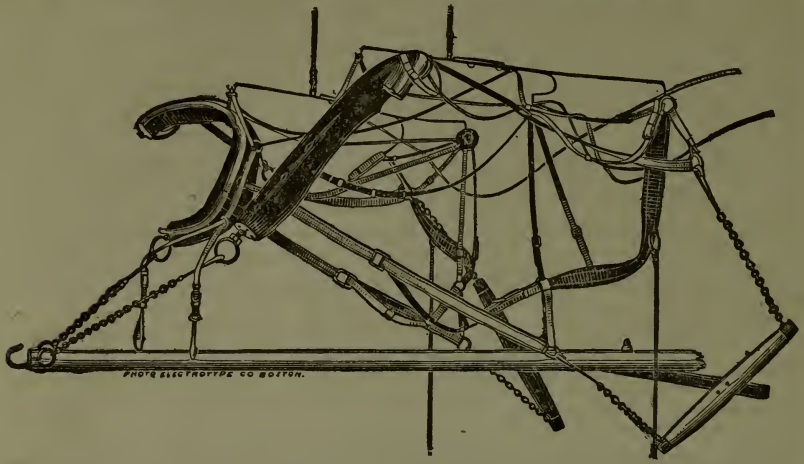
Berry's Patent Hames for Swinging Harness.

Invented August, 1873. Patented November, 1880.

STRENGTH, DURABILITY, QUICKNESS, SIMPLICITY.



This Cut represents the Hames patented by Charles E. Berry, and used in the Construction of Swinging Harness. They are of the "Extension" pattern, and can be made to **FIT PERFECTLY ANY COLLAR.**

The material used in their manufacture is the finest wrought iron, and being joined at the top by a hinge, locks easily and without being guided. The method of suspension (also patented by Mr. Berry), is of the simplest, and after being placed in position according to instructions, can be relied upon in all cases, as the Entire Harness, being suspended by one rope, can be immediately detached from the suspending rod by the driver pulling the reins.

The Hames and method of suspension are now in use in some of the finest Departments of the Union, and have invariably given entire satisfaction.

THE AMERICAN
Iron Post and Construction Co.,

OFFICE, 31 MILK STREET, BOSTON.

Manufactures a METALLIC POST FOR WIRE FENCES, possessing many great advantages over all metal posts hitherto made, among which are the following:

It is of Iron or Steel. It is protected from Rust by an Indestructible covering.

IT IS CHEAP.

It is driven into the ground—no digging of post holes.

IT WILL NOT BURN UP.

There are needed NO NAILS OR STAPLES for attaching the wire,—only sledge, wire, and posts to put up the fence.

For RAILROADS a wire fence with this post is CHEAPEST and BEST.

For FARMERS it is the CHEAPEST and BEST.

FOR COUNTRY ROADS IT IS THE BEST, as it affords no place for weeds in summer, or for snow-drifts in winter.

IT IS ORNAMENTAL, and the best for yards, gardens, orchards and trellises.

It will keep out cattle and boys. Flat, barbed or plain wire can be used with this post.
